### **DETAILED ACTION**

In view of the board's decision, the pending rejections are withdrawn.

#### ***Double Patenting***

1. Claims 22-29 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-21 of U.S. Patent No. 6,656,490. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims in both said patent and instant application involve the administration of protein C; instant claims are drawn to a method of reducing intraocular inflammation whereas the patented claims recite the reduction of intraocular fibrin. Since formation of fibrin subsequent to ocular inflammation (specification, page 1), the claims encompass each other.
